Project Title: Pomeranians

I think I would like to build my site as a multipage informational website that has a navigation bar at the top. I would like the different segments to include information about pomeranians such as history, breeding, different types, images, etc. The purpose of this site would be to teach the reader about this breed and hopefully give them an extensive overview of pomeranians.

- **Home Page/Introduction** – Some surface level information about the website and pomeranians, probably image heavy
- **Appearance**
- **Behavior**
- **Health**
- **History**
- **Sources**
